(b)(6) privacy I always thought Pavillion was an obvious case. A good example of how folks get twisted around the axel.

(b)(6) privacy

On Pavillion: ORD researchers have concluded that fracking caused the aquifer contamination there. Briefing for the Administrator and the Bobs yesterday. Additional briefings to come. Can tell you more in person or by phone.

Dear Cynthia --

Thanks for meeting with us today to discuss the path forward on Pavillion.

I took a few minutes tonight to type up a decision framework. I have no pride of authorship, but I wanted to get your sense of whether we've captured your questions before I ask folks to undertake responsive research.

The attachment does not yet identify who will be responsible for answering the questions. We'll sort that out in the coming days.

Sorry to be sending this from my personal account. The Lotus Notes server seems to be down.
